Vol. VII, No. 9

September 1963

AUGUST UNIFORM PRICE \$4.01

Dairy farmers will receive a uniform price of \$4.01 for August 1963 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. The minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge. This uniform price is five cents higher than it was a year ago.

PRODUCER RECEIPTS

Daily average producer receipts are down less than one percent from July 1963 and are two percent higher than they were a year ago. Daily herd production has dropped off a little from July, but when compared with August of 1962, it shows an increase of 68 pounds per day. There are 50 less producers on the market when we compare with August of 1962, yet we have an increase in total production of 2 percent.

CLASS I SALES

An increase of over 4 percent in daily Class I sales over July has helped the utilization of this market. Almost 75 percent of producer milk was used in Class I, which is about 4 percent higher than the utilization percentage of July. Class I sales are also higher than they were in August of 1962, but because of the increase in production, the Class I utilization of producer milk is slightly less. Some packaged milk sold outside this marketing area has helped boost the Class I sales over last year. Gallons of milk in paper cartons are being purchased from a handler under another Federal Order and being sold in this marketing area. This procedure will undoubtedly go on until handlers in this marketing area equip themselves with the gallon type paper packaging machine.

CLASS I PRICE

The Class I price for the September 1963 delivery period will be \$4.32 per hundredweight for 3.5 percent milk. This price was computed by adding \$1.30 per hundredweight to the basic formula price (\$3.10), minus the 8 cent supply-demand adjustment. The supply-demand adjustment for the October 1963 delivery period will be a minus 2 cents.
